Low Power TEC Controller

Notes:

1. Use of closest 5% values for 1% resistors should be acceptable.

2. Substitute for L272M is Motorola TCA0372DP1.

3. L272 (no "M") or Motorola TCA0372DP2 may be used for higher drive but it is a 16 pin part.

4. LF347 may be replaced with another general purpose op-amp.
